Confidently

Act  
On Wellness

# PROBLEM STATEMENT

Healthcare information exists. For too many women, the path from **information** to **action** is still broken.

Women in underserved communities worldwide face interconnected barriers that make it difficult to understand health information, access appropriate care, and make informed wellness decisions.

Your Health. Your Voice. Your Sakhi.

### 1. HEALTH LITERACY

Nearly **1 in 2**

surveyed Europeans had inadequate or problematic health literacy.\*

Limited ability to access, understand, evaluate, and use health information.

### 2. HEALTHCARE ACCESS

**4.6 billion**

people were not fully covered by essential health services in 2023.\*\*

**2.1 billion**

people experienced financial hardship from out-of-pocket health spending in 2022.\*\*

Progress is being made, but millions still cannot access or afford the care they need.

### 3. CULTURAL & STRUCTURAL BARRIERS

**76%**

of unpaid care activities worldwide are performed by women.\*\*\*

Gender norms, stigma, limited mobility, financial constraints and limited decision-making power can delay or prevent access to care.

**Only 63%**

of adolescent girls' needs for modern family planning are met globally.\*\*\*\*  
In South Asia, MENA and Sub-Saharan Africa – one in two or fewer.

Every woman deserves to understand, navigate, and take charge of her health.

## EXISTING APPS IN THE GLOBAL MARKET

#### Flo

- 420M+ users
- 22 languages
- Strong in cycle, fertility, pregnancy & perimenopause tracking and insights

PROPOSED SOLUTION

Your Health. Your Voice. Your Sakhi.

Sakhi is a multilingual, voice-first AI wellness companion that helps women in underserved communities **understand** health information, **navigate** care, **build** healthier habits, and **prepare** for meaningful conversations with healthcare professionals.

Sakhi provides wellness education, navigation, and preparation support — **not diagnosis or treatment.**

WHAT SAKHI DOES

**UNDERSTAND**  
Simplifies complex health information, reports and medical terms in your language.

**NAVIGATE**  
Helps you find the right care options based on location, affordability and preferences.

**PREPARE**  
Creates questions and organizes information so you feel confident in your healthcare visits.

**ACT**  
Supports daily wellness goals with reminders, tracking and personalized guidance.

KEY CAPABILITIES

**Voice-First, Multilingual**  
Natural conversations in your language; text or voice.

**Multimodal Understanding**  
Upload or take a photo of reports, prescriptions or documents.

**Trusted & Source-Grounded**  
Information from verified health sources with clear citations.

**Personalized & Culturally Aware**  
Adapts to your context, preferences, life stage and local practices.

**Safe & Responsible AI**  
Privacy by design, safety guardrails and crisis escalation when needed.

Azure Security Privacy, Safety & Compliance

Sakhi empowers every woman to understand, navigate and take charge of her health and wellness.

Equity. Inclusion. Trust.

# SAKHI – KEY FEATURES

## One companion. Many ways to support her wellness.

Sakhi combines AI, voice and trusted information to help every woman **understand**, **navigate**, **prepare** and **act** – every step of the way.

### 1. INSTANT HEALTH SUPPORT

AI Copilot-powered chat for answers to health and wellness questions in simple, easy-to-understand language.

24x7 Support Trusted Guidance

### 2. EXPLAIN MY REPORT

Upload or take a photo of reports, prescriptions or documents. Sakhi explains what they mean and suggests questions for your doctor.

Plain Language Source-Grounded

### 3. APPOINTMENT PREPAREDNESS

Organizes your symptoms, reports, medications and questions so you can have more meaningful conversations.

Smart Summary Question Generator

### 4. CARE NAVIGATION

Find nearby and affordable care options based on your location, language, budget and preferences.

Local Services Affordability Filter

### 5. WELLNESS & LIFESTYLE SUPPORT

Personalized guidance on nutrition, activity, sleep, stress and more – tailored to your goals, culture and life stage.

Personalized Tips Habit Tracking

### 6. VOICE-FIRST & MULTILINGUAL

Natural voice interaction and content in multiple languages. Designed for low literacy and low connectivity.

Voice First 20+ Languages

#### SAFE & RESPONSIBLE AI

Health-specific guardrails, content safety, crisis detection and clear escalation pathways.

#### PRIVACY BY DESIGN

User consent, minimal data collection, encryption and full control over your data.

#### OFFLINE & LOW-BANDWIDTH

Works in low connectivity environments with offline access to key features.

#### INCLUSIVE BY DESIGN

Accessible UI, large text, audio support and support for differently-abled users.

#### PARTNER & COMMUNITY LINKAGE

Connects with trusted health organizations and community health workers.

Sakhi empowers every woman to understand, navigate and take charge of her health and wellness.

Equity. Inclusion. Trust.

1. “Explain this report in my language.”
2. Sakhi simplifies terms and cites trusted sources.
3. Sakhi can schedule an appointment.
4. Sakhi supports reminders and small wellness goals.

# Sakhi

Your Health. Your Voice. Your Sakhi.

# Thank You!

Together, let's build a future where every woman understands her health, navigates her options and lives a **healthier, empowered** life.

### Empowering Women

Putting women at the center of health and wellness.

### Global Impact

Bridging gaps and creating meaningful change worldwide.

### Trusted & Responsible

Grounded information, privacy by design and responsible AI.

### Innovative by Design

AI-powered, inclusive solutions for real-life challenges.

### Stronger Communities

Better understanding leads to better decisions and healthier communities.

When women rise, families thrive. When families thrive, communities prosper.
